

Research Paper

In Module 7 you will submit your final research paper that will compare and contrast two different types of platforms. A platform is a type of UAS, for example, compare and contrast a Predator B and the FireScout. The UAS you chose **must** be from two different manufactures. In your paper, you should discuss the type of system, capabilities, structure, limitations, payload, support equipment, and users. It is not enough to merely list what is the same and what is different. Why is it important to see what is the same and what is different? Compare and contrast essays promote critical thinking. Ensure you apply critical thinking, do not just list or discuss two separate UAS. **Compare and Contrast** both UAS together, throughout the whole paper.

The research paper is a minimum of 5 pages and a max of 10 pages in APA format. The title page, abstract, and reference page do not count for the 5-10 pages. Identify and cite **a minimum of four references** and add to the References section at the end of the paper.

Note: Your paper will be submitted through a plagiarism detection tool. Submitting the same paper to more than one course is considered self-plagiarism and will result in a failing grade
