Masters in Architecture Major

We are in a hotel with my mentors, Mr. Fred who is a member of SA+P and Mr. Bill, who is my relative. I am going to task them with some of the questions I have regarding my education to see whether I will improve and do my best.

Me: Hello Mr. Bill

Mr. Bill and Mr. Fred: (in unison) hello, how are you?

Me: I am fine, thank you

Could you please guide me through some of my problems involving my education and professional career?

Mr. Bill: It is alright son

Me: okay

Which is the best place to stay? Is it close or far away from home?

Mr. Bill: According to my opinion staying close to the school is the better option. This is because you will be able to access the school with much ease, facilities like the school library you will utilize them maximum, and this will be of great benefit to you.

Mr. Fred: What my colleague has said it is the idea to follow

Me: Is education worth the cost?

Mr. Fred: With the proper choice of the program, education is always worth its cost.

Mr. Bill: According to my own opinion it is not even about the choice of the program, education is worth its cost regardless of the program. Someone who is educated and the other who is will never be equal; the educated one is always at an advantage over the other.

Me: What choices of programs are the best to choose?

Mr. Fred: To find the best choices of programs to take always follow your passion

Mr. Bill: Passion and your capabilities should be the most significant considerations to have when choosing the program

Me: Should I aim at school with the rigorous application process or those with open enrollment?

Mr. Bill: Those schools rigorous are the best schools

Mr. Fred: You can go for them or go for those with open enrollment because these have increased chances of being admitted

Me: What should I do to increase the chances of being accepted?

Mr. Fred: Go for those schools that have an open enrollment system of admission

Mr. Bill: I consider that as the best idea also.

Me: Okay. I will consider your opinions great people. Thank you for your time

Mr. Bill and Mr. Fred :(in unison) welcome.

In ten years from now, I will keep someone of substance to the country if I follow the instructions from my mentors. I will be through with studies and probably will be working. I am aspiring to be an architect in the future and become successful in my life. Unfortunately, if this does not come true, I will not give up, but I will hustle hard in the streets until I become somebody.
